

DCN-D Discussion Unit

Talk about perfection

BOSCH

Invented for life

DCN-D Discussion Unit

Elegant, slim design combined with the renowned Bosch user interface

- ▶ Unique slim design combined with the intuitive Bosch user interface
- ▶ Elegant, dark charcoal look suits any décor
- ▶ Superior sound quality optimized for speech
- ▶ 31 interpretation channels, plus floor channel
- ▶ Full range of voting facilities
- ▶ Immune to mobile phone interference

Your meetings are always in good hands

The DCN-D Discussion Unit is an additional unit to the Digital Congress Network (DCN) Next Generation system by Bosch. It is suitable for use in everything from small discussion setups to more complex, multilingual meetings. As with all DCN Next Generation delegate units, unique design is combined with the renowned and intuitive Bosch user interface that allows users to relax and enjoy the speaking and listening experience. With DCN Next Generation and the new DCN-D Discussion Units, your meetings are always in good hands.

Stylish and unique appearance

The DCN-D Discussion Unit has a stylish and unique appearance with a streamlined, modern design and elegant dark charcoal and silver matt finish. And for the perfect fit with the décor of all types of conference rooms, matching colored microphones (dark charcoal and silver white) are available.

Design that encourages dialog

The design of a discussion unit plays a key role in how people interact with each other at meetings. It also has a vital function in creating an environment that encourages constructive dialog. Striking the right balance between aesthetic appeal and ergonomic efficiency, combined with its knowledge about intuitive interfacing, is what give Bosch an edge in helping delegates to focus completely on their speech while using the units. What's more, enhanced acoustic and display technologies make it easy to hear and read exactly what is going on, so even new users feel at ease and in control. And that's good news for every conference, no matter what the topic.

When you think conference, think Bosch.

The DCN-D Discussion Unit (*), with its unique design and dark charcoal exterior, is part of the DCN Next Generation system and offers various functionalities like language selection and voting. The system can be configured as a DCN-D-only system or integrated with other DCN Next Generation wired or wireless discussion units.

Fixed or pluggable microphone developed by Bosch provides outstanding speech intelligibility.

With its ergonomic curved shape, slim design and elegant matt silver and black finish, the DCN-D Discussion Unit fits in well with all kinds of decor.

Available with basic talk functions up to extended versions with additional channel selector and with five addressable voting buttons.

	DCN-DL	DCN-DS	DCN-DCS	DCN-DV	DCN-DVCS
