

# Arena Electrol

Motorized projection screen - 12 meters wide by 6 meters height maximum

Customized to  
your request

The Arena Electrol® is the solution to your large venue motorized projection screen needs.

- Robust case with a powerful motor and Polichinelle, which is a unique motorized cable and pulley system.
- The Polichinelle system guarantees a safe, taut and horizontal screen projection surface even in the largest sizes.
- The case and the projection screen surface can be made to exactly the right size.
- Available with matte white or matte white Sound projection screen surfaces.
- The Arena Electrol is supplied with a RF remote control as standard.
- The screen is mounted using mounting brackets on the top or to the rear of the case. Depending on the length of the case, the screen is supplied with up to four brackets.
- Also available with a rear projection screen surface in addition to matte white. The seam in the rear projection screen surface may be slightly visible under projection.
- The motor is equipped with electric locks to prevent inadvertent unrolling and features thermal overload cut-off.

## Polichinelle System

In a standard projection screen, the weight of the slat bar, along with other elements, ensure that the projection screen surface remains properly tensioned. The Polichinelle system reverses the usual situation to achieve the correct tension. With this system, the projection screen surface rolls up around the slat bar which is retracted by two steel cables. This system can be adjusted both in the case and the slat bar, ensuring that the projection screen surface is smooth and taut under tension. The Polichinelle System ensures the flattest possible screen surfaces for sizes over 8 meters wide and is the ideal choice for auditoriums, theaters and other large venues.

Matte White projection surface in this projection screen is a vinyl based material without black backing.
